UNIFY ME - COMMUNICATE

Through AVI-SPL's Unify ME™ services, meeting over video is easy. We offer a complete suite of managed services, whether a company chooses to purchase infrastructure that we manage, or elect for a hosted model, using AVI-SPL's infrastructure. Customers can use their network, ISDN, public Internet, or mobile devices and Unify ME Communicate Services delivers the quality connection required to make every meeting a success. Through the Unify ME program, companies receive the convenience of:

Immersive Telepresence, High Definition (HD) and Legacy Calls

Managed Video Communications Services

Bridging Services

Audio Conferencing Support

Recording Services

Streaming Services

MANAGED VIDEO COMMUNICATIONS SERVICES

Through an AVI-SPL Managed Services subscription, organizations can meet with multiple locations quickly and easily. Our VNOC® Services provide all the necessary support for both ISDN and IP technologies for multiple sites and technologies.

Through our global meeting service, customers obtain the highest quality of service for their collaboration needs. Our bridging service includes:

- Enhanced continuous presence layouts
- Pre-call site certification
- Call monitoring & recording
- Online scheduling
- Streaming and recording
- Multiple viewing options
- Content sharing
- Recurring reservations
- Meeting dial-in numbers
- ISDN Gateway calling

COMPREHENSIVE MEETING SERVICES

Unify ME Communicate helps schedule and conduct successful video conferencing calls with ease, providing state-of-the-art facilities and skilled technicians to assist clients every step of the way.

- Supports Immersive Telepresence, High Definition (HD) and legacy systems
- Meet and greet services available
- Over 27 different screen-layout viewing options are available
- Meeting monitoring by technicians available live on video
- Record your meeting to a digital format
- Supports standards based content sharing

MANAGED BRIDGING SERVICES

AVI-SPL offers its customers the ability to purchase ports without purchasing infrastructure, providing a lower cost of entry into video conferencing. With this service, customers have the ability to have unlimited port use, 24x7x365, along with meeting services. This enables organizations to have meeting accessibility at all times, with the confidence that the skilled AVI-SPL team will manage and monitor their calls.

VIRTUAL MEETING ROOM SERVICES

AVI-SPL has the capability to offer an unmanaged service to those companies looking for a simple way to conduct video meetings, without any additional meeting services. With this type of service, customers can still access all the benefits of face-to-face communication, but rely on in-house resources to manage and monitor their endpoints, desktop clients, scheduling and calls.

AVI-SPL's Unify ME is a blend of services that meet and support your communication needs. Our ability to merge services across the meeting environment and the meeting experience provides our customers with valuable solutions designed specifically for them.

Let us Unify your world.

How to Get Started

Discovery

Meet with specialists from AVI-SPL to discuss your existing needs and areas of concern. We'll provide essential information about your network and equipment, so you can make an informed decision.

Design

AVI-SPL works with you to design the services you need to successfully address your network needs.

Deliver

Once you have the proposal and details of the services AVI-SPL recommends, a deployment and provisioning schedule is created to ensure services are not disrupted during the transition.
